

Submission to NESSIE

Name of submitted algorithms: **ACE Encrypt** and **ACE Sign**.

The ACE Encrypt algorithm makes use of a technique that is the subject of a patent filed by IBM. See the enclosed document `ace-patent.pdf` for a letter to the ISO regarding its licensing policy.

The reference implementation of both ACE Encrypt and ACE Sign is licensed under the IBM Public License, which also contains allowances for the use of any patented material in the reference implementation. The document `ace-license.txt` contains a copy of this license.
